

# Lemmi

Download App

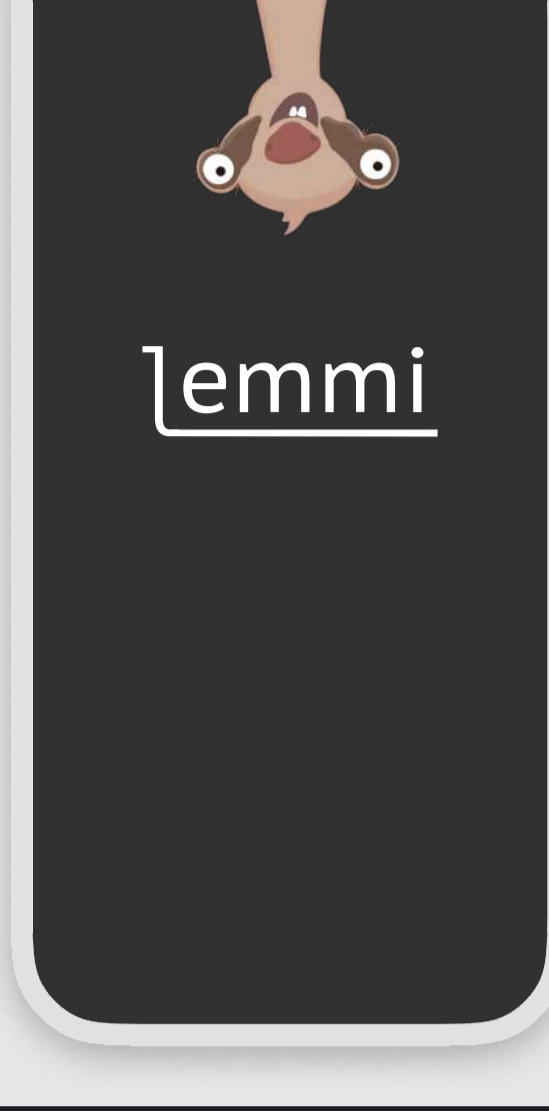

## the platform for providing services and recruiting professionals

The Lemmi expert helps to start freelancing easily and to find experts who solve your tasks faster via clear and user-friendly app.

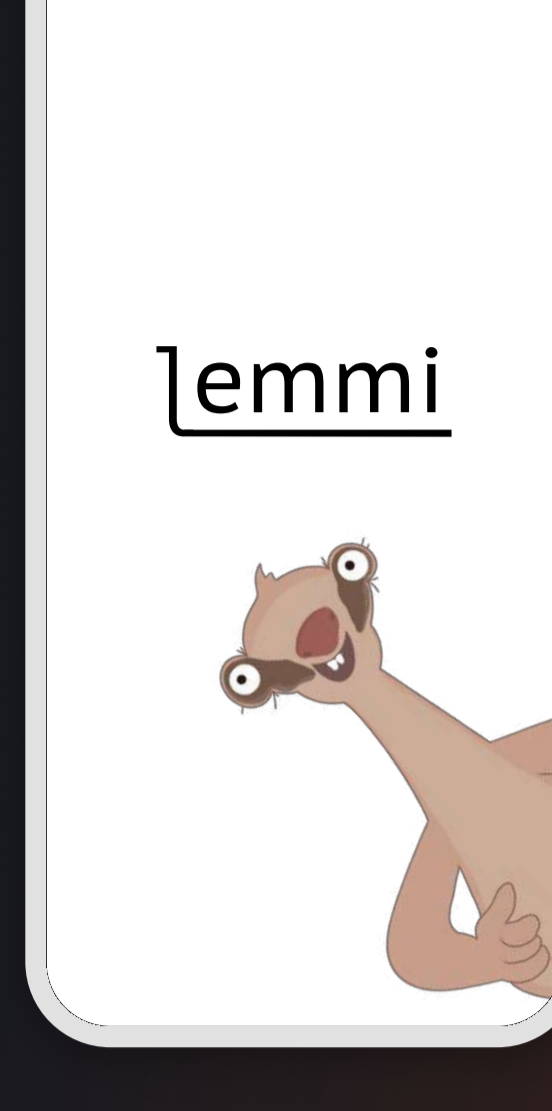

The platform also has a separate smart UI application with clear UX for administration and control goals.

## Who is client?

On the one hand - professionals that can find tasks that fit their competencies, work when it is convenient and earn more.

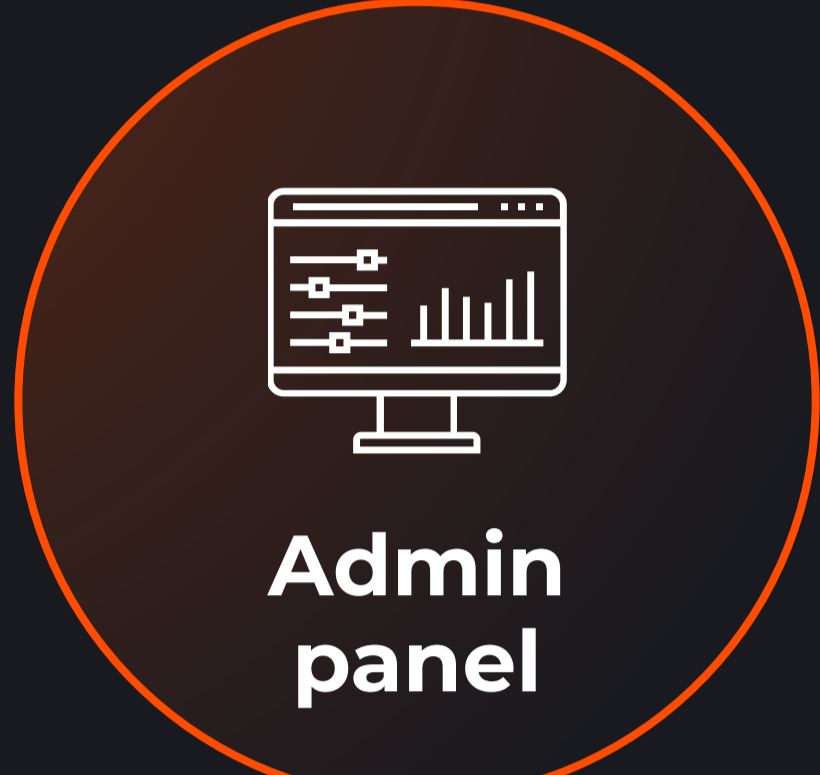

On the other hand - clients that can efficiently solve problems that are better to be entrusted to a professional.

## Task

Support and develop:

## Technologies

Dart App Development

Flutter App Development

JavaScript Development

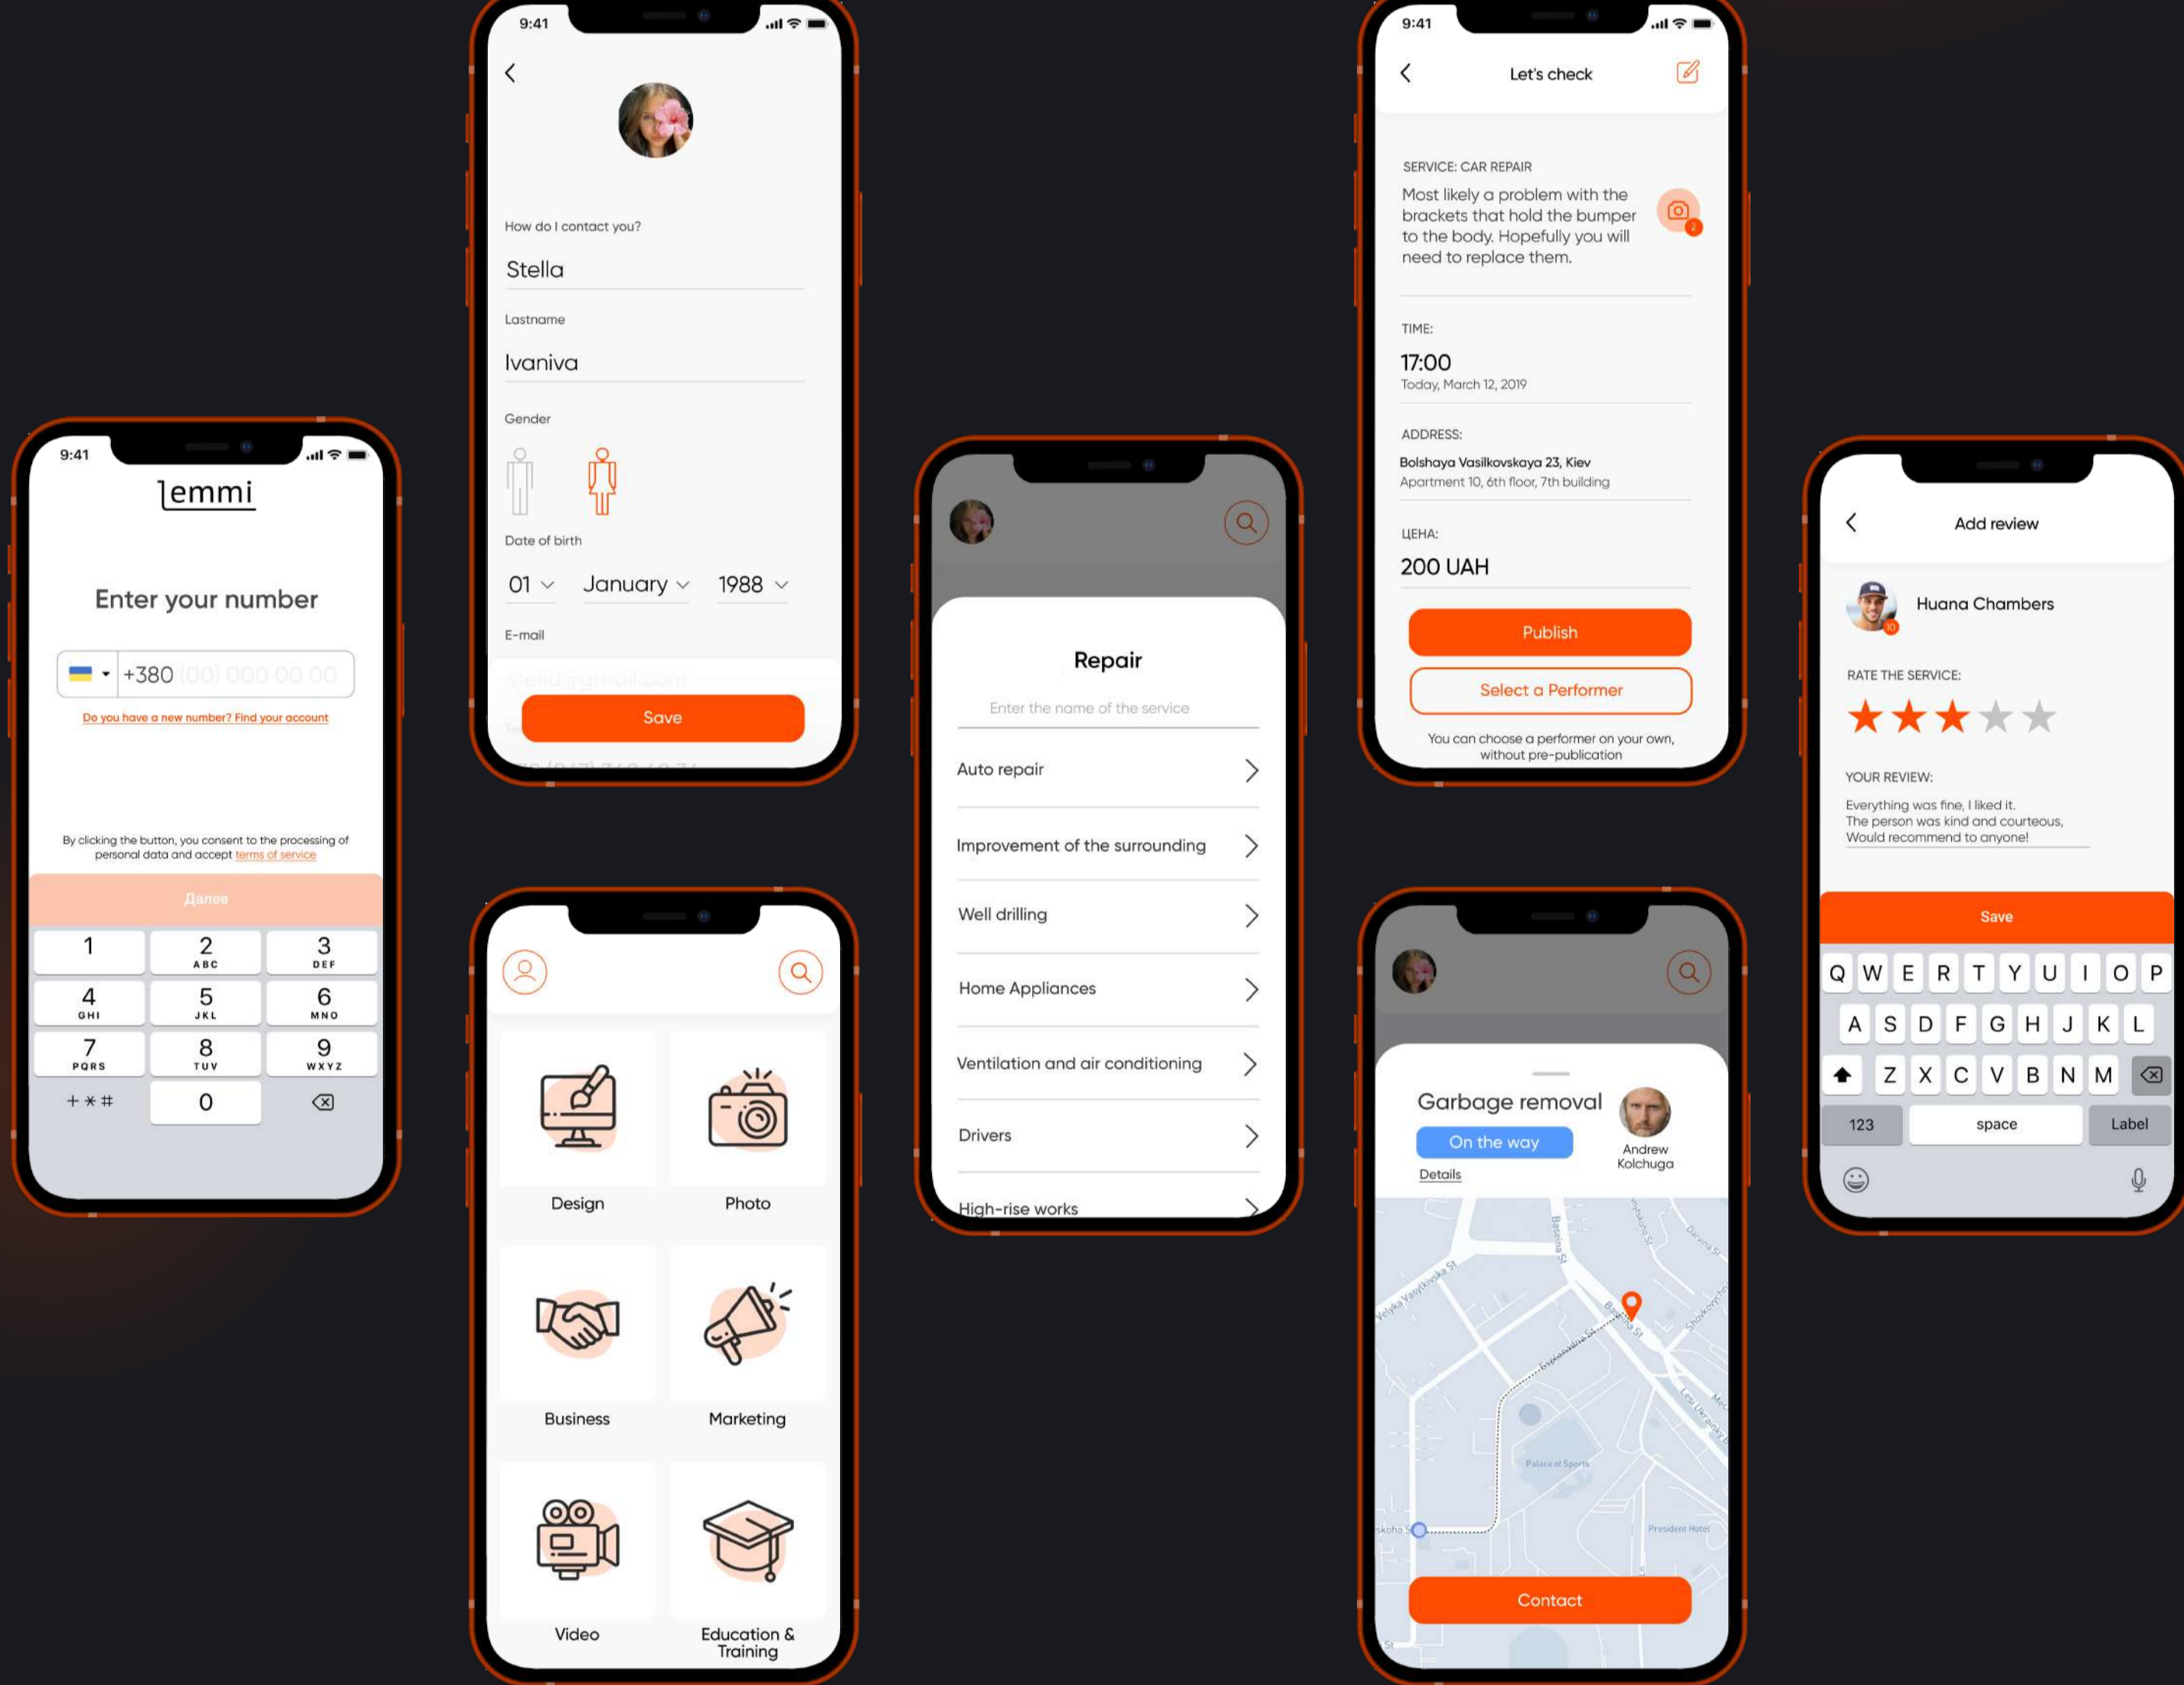

Vue.js Development

Node.js Development

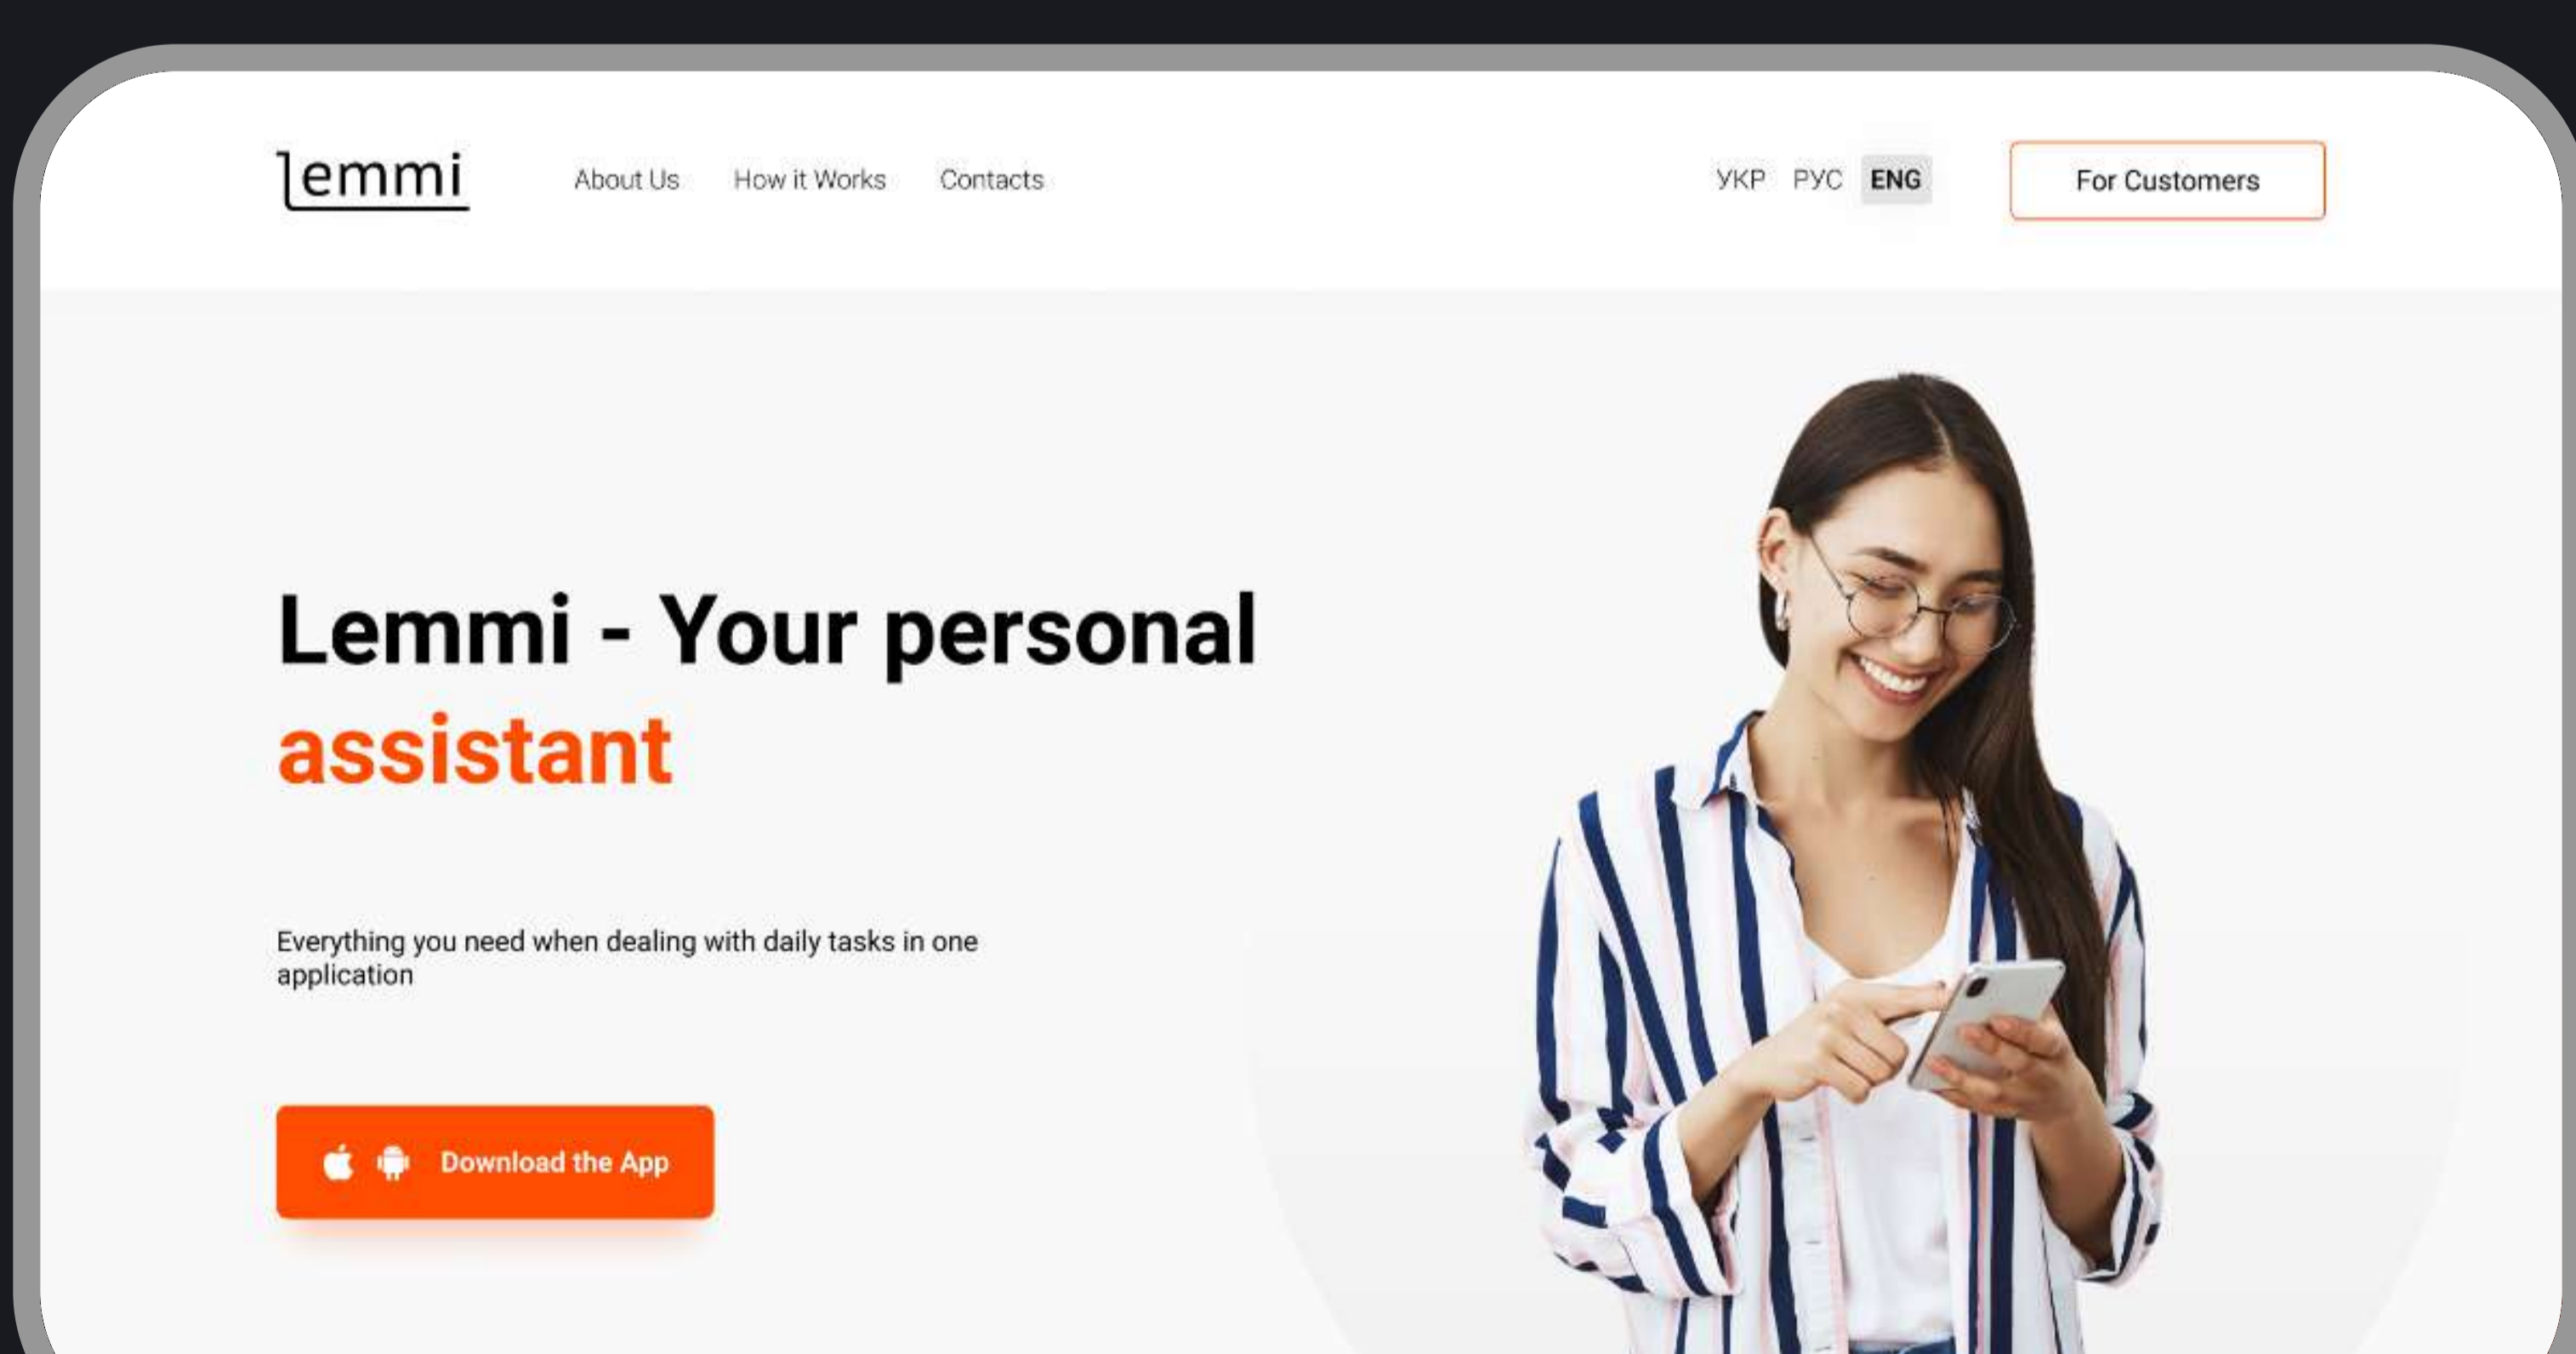

## Mobile app

- smart registration on the go with phone number
- only verified contractors
- the ability to track the progress in real time
- easy search contractor by job category
- the ability to choose those assignments that fit your requirements by sorting and filtering system
- rating and feedback system to find the most qualified experts
- easy order publishing

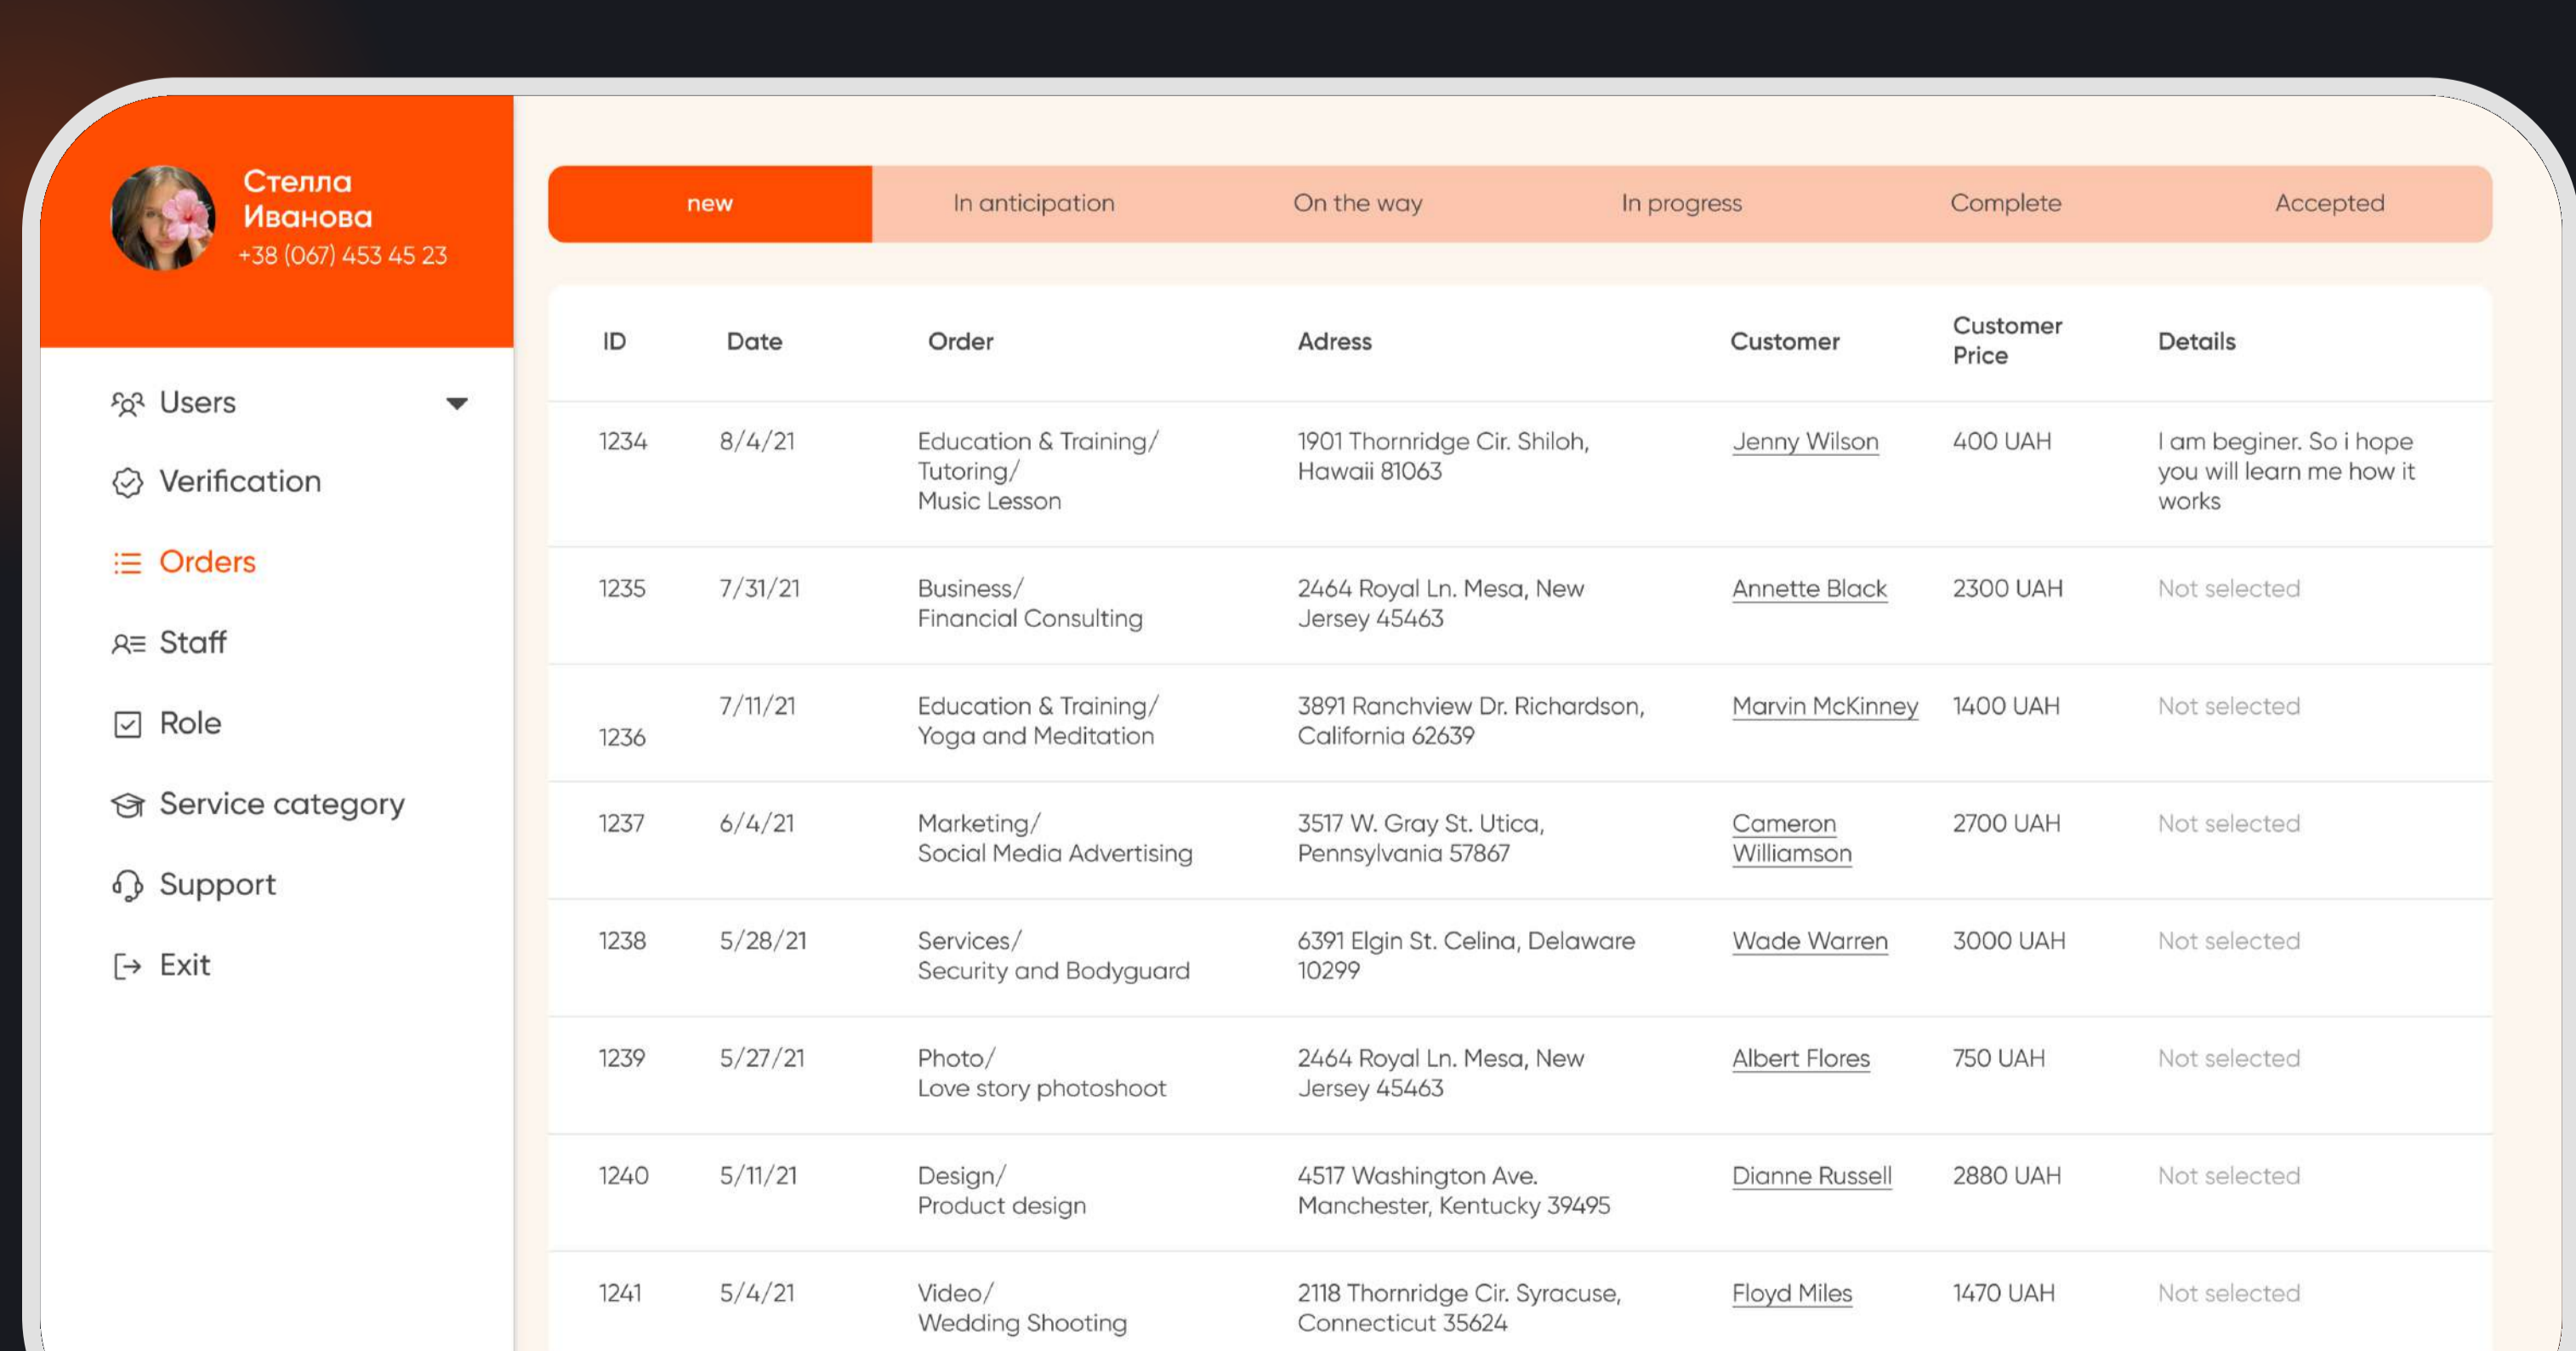

## Web site

The task was to develop a landing page that would display information about how the platform works from the client side, who is looking for a service, and from the expert side, which provides services.

## Admin Panel

For the comfortable management of the platform was the task to develop a convenient admin panel. The main task of the admin panel work with accounts and content for the platform.
